

MUHAMMAD ABDULLAH

Cybersecurity Analyst | SOC & Incident Response | M365 / IT Operations

LinkedIn | GitHub

muhammaddabdullah@outlook.com | +92 320 5610211

PROFESSIONAL SUMMARY

- **Experience:** 2 years of international remote SOC, incident response, and IT operations supporting North American enterprise clients.
- **Incident Response:** Proven track record in threat mitigation and active containment of Akira Ransomware.
- **Technical Stack:** Proficient in Elastic SIEM, M365 Defender, threat hunting, and Python/Pandas log automation.
- **Specialization:** Bridges data science and SecOps for rapid, high-volume threat triage (100+ alerts weekly).
- **Client Focus:** Dedicated support for Canadian enterprise environments, including M365 tenant administration.

TECHNICAL SKILLS

- **Security Operations:** Elastic Security (SIEM), Incident Response (IR), Alert Triage, Phishing Analysis (Perception Point), IOC Hunting, OSINT.
- **Threat Detection:** MITRE ATT&CK Mapping, TTP Analysis, Sysmon, Osquery, Anomaly Detection, Cyber Kill Chain.
- **Infrastructure & Admin:** M365 Defender & Admin (Pax8), SonicWall / WatchGuard Firewall & VPN, RDP/SSH Forensics, VMware ESXi, Windows/Linux.
- **Data & Programming:** Python (Pandas, NumPy, OOP), Bash Scripting, SQL, Regex, Jupyter Notebooks, Matplotlib.

PROFESSIONAL EXPERIENCE

Cyber Security Analyst — Ninpo Inc. (Ottawa, Canada – Remote) Oct 2024 – Present

- **Ransomware Incident Response:** Provided key tactical support during an Akira Ransomware engagement; assisted in isolating compromised Domain Controllers and ESXi hosts, preventing large-scale encryption.
- **Threat Hunting & Triage:** Investigate 100+ weekly alerts in Elastic SIEM and classify phishing via Perception Point (95%+ accuracy); surfaced access vectors including compromised VPN credentials and unauthorized RDP lateral movement.
- **Detection Engineering:** Partnered with engineering to tune SIEM rules, cutting false-positive rates by 20% through baseline behavior analysis and log correlation.
- **Endpoint Hardening:** Audited Elastic EDR health across hybrid environments, remediating hosts with disabled anti-tampering protections to ensure 100% telemetry coverage.
- **IT Operations & M365 Admin:** Administer M365 tenants via Pax8, configure VPNs and firewall updates, resolve client support tickets, and provision endpoints for new hires.
- **Reporting:** Built incident metrics mapped to MITRE ATT&CK, giving leadership actionable data on adversary TTPs.

GIS Intern — PCRWR (Islamabad, Pakistan) Jul 2025 – Sep 2025

- **Workflow Automation:** Developed Python scripts to automate ingestion of spatial datasets, reducing manual processing time for government resource planning.
- **Data Analysis:** Applied statistical methods to identify pattern anomalies, demonstrating high-volume data management transferable to security log analysis.

EDUCATION

B.S. in Remote Sensing & GIS — COMSATS University Islamabad Expected Sep 2027

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- Blue Team Junior Analyst – Security Blue Team (BTL1)
- IBM Introduction to Cybersecurity Essentials
- CompTIA Security+ (In Progress)
- Identity Security Sales Certification – WatchGuard (Exp. 2026)
